

Says

What have we heard them say?
What can we imagine them saying?

Health is a physical line of communications. The patient on the receiving end who is in the home. The provider reaching out from a clinical site.

By making eye contact, smiling, and offering kind word, rather than shuffling through paperwork, doodling on a notepad, a physician, nurse or nurse's aide can lessen the patient's anxiety. Engages attention demonstrates that you genuinely care about the patient.

It is important to and upfront about your symptoms even if you feel embarrassed or shy. Have an open dialogue with your doctor or with your healthcare provider, ask question to make sure your diagnosis, treatment and recovery. health care is an improvement via the prevention, diagnosis, amelioration, or cure of diseases. Health care is provide by health professionals and allied health fields.

Behavioral health generally refers to mental health , substance use disorders, life stressors and crises, and stress related physical symptoms. Behavioral health care refers prevention, diagnosis and treatment of those condition
